**Stilwell Baker names Brian Terhune as Operations Director**  
*Terhune brings over 20 years of industry experience to Stilwell Baker*

Vancouver, WA –Stilwell Baker Inc., a leader in electronic engineering and manufacturing in the aerospace, industrial controls, and medical equipment markets, has named Brian Terhune as Operations Director. Terhune comes to Stilwell Baker with over 20 years of project management experience in aerospace systems and software development. Terhune, who earned a BS in mechanical engineering from the University of South Florida, most recently served as senior project manager for Erickson Air-Crane.

All project- related operational activities at Stilwell Baker will be within Terhune’s purview. He will be responsible for project management, procurement, manufacturing, and will also direct the Stilwell Baker engineering and quality departments. His focus will be to streamline operational processes within the company and build upon Stilwell Baker’s long standing reputation for on time delivery of innovative electronic and mechanical design solutions for new products and legacy systems.

Darrel Baker, President and CEO of Stilwell Baker, remarked, “With the increasing number of challenging and complex projects we’re undertaking in the aerospace, industrial, and medical device markets, it’s crucial for us to effectively manage all facets of the business to meet and exceed customer expectations. Brian has the industry-specific knowledge and experience to drive the operational side of the organization to an exceptional level of productivity. He’s also a real fit for our collaborative culture, and will be a significant addition to our management team.”

Stilwell Baker designs and manufactures custom electronics in the USA, to regulatory standards. The company provides engineering, reverse engineering, and upgrades of complete electronic systems in the aviation/aerospace, industrial control, medical, and other industries.
