## MEDIA ALERT

### **Ray Burney Joins Stilwell Baker as Vice President Engineering**

**Portland, Ore. – June 2, 2009** - Stilwell Baker Inc., a leading provider of Contract Engineering and Engineering Services to electronics design companies, has announced that Ray Burney has joined the company as its Vice President Engineering. Mr. Burney will be responsible for leading Stilwell Baker's Contract Engineering services.

"Ray Burney has deep experience as a senior engineering and business executive and is a key addition to Stilwell Baker—we're thrilled to have him join us, commented Peter Hoogerhuis, COO of Stilwell Baker. "Ray knows all aspects of electronic product development, he's led engineering teams, and he's managed outsourced service providers, which means he understands the needs of business/engineering management and the constraints on today's product development teams."

"Stilwell Baker's continued investment in people and resources to develop a sustaining engineering business is unique in today's economic environment," commented Ray Burney. "I'm looking forward to working with a team that is strategically focused and well positioned to deliver engineering solutions for existing and new customers and the industry at large."

Ray was most recently with Hewlett Packard where he served as the R&D Section Manager, responsible for delivering Analog ASIC Technology, Power Systems, Sensor Systems and Motion Control for the Consumer Inkjet Printing Business. Ray has extensive international, R&D, manufacturing, operations management, and new product delivery experience. Prior to HP, Ray held management positions with ETEC Systems and Rockwell Automation.

Ray holds an MBA from Washington State University, Vancouver, WA, a BS Electrical Engineering from Southern University, Baton Rouge, LA, and is a graduate of the Wisconsin Military Academy.

Ray also served 14 years in the US Army / National Guard and currently a 2LT in the Inactive Ready Reserves.
